

Company Snapshot

At a Glance

Axcient's Recovery-as-a-Service cloud eliminates data loss, keeps applications up and running, and makes sure that IT infrastructures never go down.

Axcient replaces legacy backup, business continuity, and disaster recovery products with a single, integrated and easy-to-use solution.

Our Difference

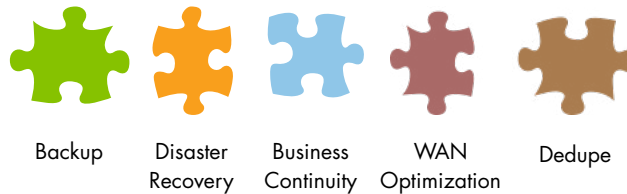

A New Type of Cloud Platform

Axcient is disrupting a \$26 billion market by providing an innovative way to protect data and applications. In a market dominated by legacy players with outdated technology and that have grown through acquisitions, we see the opportunity to provide users with a new way of protecting their companies and eliminating application downtime.

Built from the ground up as a cloud platform, Axcient is providing businesses of all sizes with an integrated and easy-to-use solution that improves data protection, minimizes data loss, and saves companies money.

Company Snapshot

Our Culture

Customer First

Our values help us stay the course in this challenging market environment and is the key to our success. As the company experiences tremendous growth we have made our core values a centerpiece of our strategy to remain truthful to what brought us here in the first place.

Our Customers

Trusted by businesses nationwide

Since our inception in 2007, Axcient has helped enterprises of all sizes protect their data and applications from downtime. Over 4,000 businesses trust Axcient with their critical business applications. From sports teams such as the NHL St. Louis Blues, to financial services companies such as Union Bank, and transportation companies like Budget, Axcient supports businesses in all industries and of all sizes.

The Axcient Solution

Full data and application protection

Axcient replaces traditional backup, disaster recovery, WAN optimization, deduplication, replication, and business continuity products with a single integrated cloud platform.

The Axcient Solution

Axcient is protecting over 18 billion customer files and applications with data centers in the US and in Canada. These data centers provide premium interconnection and colocation services to ensure 100% uptime and 100% on-time service delivery SLAs.

Axcient Values A guide to what we care about

Rapid Recovery

Gives customers a local physical or virtual appliance for fast data recovery and additional protection

Physical & Virtual

Protection of physical and virtual servers, laptops, desktops and workstations

Application Continuity

Application continuity through one-click server failover to the Axcient appliance

Cloud Virtualization

Ability to virtualize an entire office in the cloud in minutes for true business continuity

True Cloud Platform

Axcient is a true cloud platform with no software to install, and one interface to manage everything
